

#### CARE:

Wipe the inside of the wraps down with a damp cloth to clean and place back in the hard carry case for protection.

#### TIPS FOR USE:

While there are no cords for your horse to step on our get tangled in, we do recommend your horse be tied during treatment and supervised.

- Use prior to daily training sessions to loosen up tense muscles, tendons and joints
- Use prior to massage, acupuncture or other therapeutic techniques to stimulate and release trigger points
- Limit treatment time to 20-30 minute intervals 1 to 2 times per day
- Do not use over open wounds
- 3 light intensities to customize your need from maintenance use to injury recovery

#### Technical Parameters:

- Power: 3W
- Input DC12V
- Wavelength Red 630nm and Blue 450nm
- Working Temperature - 30°-45°
- AC-DC Charger Battery Pack
- Input Voltage AC100-240V/AC200-240V
- DC11.4V 2200mAH
- Output Voltage DC12.6V 500mA

**Warranty:** 1 Year warranty on manufacturing defects included on LED wrap and cords. Horse damage (biting the wraps or cords or stepping on them) is not covered.

#### Cautions:

1. We do recommend you seek Veterinary care in case of an injury
2. Please do not clean the product in water
3. Please do not burn the battery to dispose of it
4. Limit the use of the products to no more than 30 minutes at one time.
5. Never directly look into the LED bulbs for long periods of time.

# EQUICARE LED THERAPY® PURPLE LIGHT

# How EQUICARE LED THERAPY® RED LIGHT Works

## **EquiCare LED Therapy® Purple Light stimulates a response from the body to help heal itself.**

Specifically, 2 wavelengths, red light (630nm) and blue light (450nm) that combine to make purple that works to penetrate the levels of tissue to positively affect the tendons, ligaments, muscles and joints.

The process dramatically increases the blood flow sending more oxygen throughout the body, increasing collagen, endorphins, and capillary production, speeding up the removal of waste products, and helping to heal the entire body.

**EquiCare LED Therapy® Purple Light** can aid in treating arthritis, laminitis, navicular, tendon strains, muscle swelling and tightness. Multiple size LED Therapy wraps can be used to treat virtually any part of the horse's body with the addition of the extension belt. (Neck, Back, SI, Stifles, cannon bones, knees, feet, hocks)

**EquiCare LED Therapy®** is a remarkable line of wraps at unbelievable prices for the everyday for the everyday horseman, trainer, therapist and vet.

## **EquiCare LED Therapy® Purple Light Benefits:**

- ◆ Alleviation of pain
- ◆ Alleviation of inflammation
- ◆ Stimulates the immune system
- ◆ Deep Wound Healing
- ◆ Tissue regeneration
